EN PANMIN is a comprehensive stone manufacturer that integrates research & development, production, stone processing, and trading business. We provide granite, quartz surfaces, and Crystalline Silica Free Surfaces in both slabs and cut-to-size products. Our products are widely used in residential, commercial, and other building spaces, including kitchen countertops, bathroom vanity tops, table tops, wall panels, flooring, and more.

PANMIN is committed to providing quality products and services to its customers. Its first factory Deyuan Stone was established in 1990 and currently focuses on fabricating natural stone and man-made quartz stone products. In 2015, the second factory Fujian PANMIN was founded for man-made quartz slabs production. In 2019, the third factory Zulite Stone was established in Cambodia to provide man-made quartz slabs and quartz cut-to-size products. All three factories work together to provide the best possible products and services to our customers.

In response to shifting market trends and the growing demand for environmentally friendly products, PANMIN has introduced Crystalline Silica Free Surfaces. These surfaces are free of crystalline silica, contributing to a healthier work environment. Not only are they environmentally friendly, but they also incorporate recycled materials and minerals into their composition, aligning with global sustainability efforts. Additionally, the production processes at PANMIN factories now utilize recycled water and solar energy, reducing environmental impact and further emphasizing our commitment to sustainable practices.

ES PANMIN es un fabricante integral de piedra que integra investigación y desarrollo, producción, procesamiento de piedra y negocios comerciales. Ofrecemos superficies de granito, cuarzo y superficies libres de sílice cristalina tanto en láminas grandes como en productos cortados a medida. Nuestros productos se utilizan ampliamente en espacios residenciales, comerciales y otros espacios de construcción, incluyendo encimeras de cocina, encimeras de baño, mesas, paneles de pared, suelos y más.

PANMIN está comprometido a proporcionar productos y servicios de calidad a sus clientes. Su primera fábrica, Deyuan Stone, fue establecida en 1990 y actualmente se enfoca en la fabricación de productos de piedra natural y piedra de cuarzo artificial. En 2015, se fundó la segunda fábrica, Fujian PANMIN, para la producción de láminas de cuarzo artificial. En 2019, se estableció la tercera fábrica, Zulite Stone, en Camboya para proporcionar láminas de cuarzo artificial y productos de cuarzo cortados a medida. Las tres fábricas trabajan juntas para proporcionar los mejores productos y servicios posibles a nuestros clientes.

En respuesta a las tendencias cambiantes del mercado y la creciente demanda de productos respetuosos con el medio ambiente, PANMIN ha introducido Superficies Libres de Sílice Cristalina. Estas superficies están libres de sílice cristalina, contribuyendo a un ambiente de trabajo más saludable. No solo son respetuosas con el medio ambiente, sino que también incorporan materiales reciclados y minerales en su composición, alineándose con los esfuerzos globales de sostenibilidad. Además, los procesos de producción en las fábricas de PANMIN ahora utilizan agua reciclada y energía solar, reduciendo el impacto ambiental y enfatizando aún más nuestro compromiso con las prácticas sostenibles.
